Continuation of Substance of Interview including description of the general nature of what was discussed: SF requested that the words "membrane permeable" be inserted before "compound" in line 3 to more clearly identify the types of compounds encompassed by the invention, as discussed in applicant's response filed December 20, 2004. On September 7, 2005, EGW left a message affirming the change, but requested that the words "membrane impermeant" be used instead to reflect the arguments of 12/20/04. On September 8, SF returned a message stating that a positive recitation of what the compounds can do is more clear than a negative description of what they cannot do. SF is awaiting confirmation of the change. Since EGW stated on September 7 that "membrane permeable" was OK, although another description was preferred, a Notice of Allowability will be forwarded to applicant with the language "membrane permeable" inserted into line 3 of claim 24 directly before "compound" if no further message from EGW is forwarded.
